

Connectyx Partners with I-DENTI-FIED, Inc., to add RFID Transponder Technology as part of its MedFlash Personal Health Record

TEMPE, AZ--(MARKET WIRE) June 8, 2009 -- Connectyx (Other OTC:CTYX.PK) – Connectyx Technologies Holdings Group, Inc. is pleased to announce that the Company has entered in to an agreement to provide its MedFlash technology and products as a critical component of the I-DENTI-FIED System™, a safe, secure system to positively identify individuals when they are injured or unable to speak. This system allows Secure Access to a Personal Health Record (PHR) for obtaining Critical Medical Information & Emergency Contacts at the time of need, to improve Safety and Patient Care.

The I-DENTI-FIED System™ includes a passive RFID Transponder (I-DENTI-TAG™) and a patent pending proprietary procedure for the insertion of the Transponder into a denture and ultimately a human tooth. After placement at the Dentist Office, the Patient is registered in the MedFlash(TM) Personal Health and Lifestyle Record & Portal to allow patients to store their medications, health history, Emergency Contacts, Insurance Information, Living Wills, Power of Attorney, and other important information.

In time of injury or illness, an authorized First Responder uses the I-DENTI-VIEW™ Reader to obtain the patients' unique 16-digit identification number that becomes the secure access code to the patient's medical history via the MedFlash Internet Portal, 24/7 emergency call center, or MedFlash USB device.

"Personal medical information needs to be secure, while at the same time, still providing doctors and hospitals easy access to vital information during an emergency," said I-DENTI-FIED Chief Medical Officer Kevin M Brunski D.D.S. "By joining forces with MedFlash, I-DENTI-FIED is better able to provide an easy, but very secure way to manage your medical information and have it available when it is most needed".

"The safety of our users is our top priority, and it's at the center of our MedFlash product," said Ronn Schuman, Connectyx President and CEO. "We are excited by our partnership with I-DENTI-FIED and believe they will be a strong channel to distribute our product because, together, we address a real need to provide what may be life saving information, especially where the injured person is unconscious or suffers from dementia."

About I-DENTI-FIED, Inc.

I-DENTI-FIED, Inc. is a privately held corporation based in Indiana. The I-DENTI-FIED System™ provides a safe, secure, noninvasive, and confidential method for the storage and retrieval of both identification and critical medical information. Thanks to the patent pending technique of implanting an RFID Transponder (I-DENTI-TAG™) into a tooth or dental structure, First Responders can identify people who are injured or unable to communicate in a variety of emergency and non-emergency situations, access their medical history and use that knowledge in their treatment. For more information or to take a multimedia Flash tour of Solution, visit www.i-denti-fied.com.

About Connectyx Technologies Holdings Group Inc.

Connectyx Technologies provides products in the health care market which include its Personal Health Record, MedFlash(TM). The MedFlash product is an easy-to-use Personal Health and Lifestyle Record & Portal that is USB flash drive-enabled. MedFlash contains an emergency flash drive with a web portal and 24/7 emergency call center access that can contain the owner's complete medical and key information. Stored MedFlash information can be accessed on any computer securely with complete privacy for the members. For more information, please visit www.connectyx.com and www.Med-Flash.com.
